

Hello my name is Edward Olu of Lowell Massachusetts. I am very early in my career but I do have plenty to offer as shown on my resume. I have experience with JavaScript and Typescript. I have worked as a junior DevOps engineer with very high level teammates at Drizly to help maintain and sustain our services. I gain a lot of experience learning how to work with AWS, Terraform, and K8s. I even have a good understanding of the SDLC. I used a lot of github actions and Jira to help make sure our team was on track during our sprints. I hope me being young and junior level does not discourage you from taking a chance on me!
